To Whom It May Concern:

This letter is to express an appreciation for the Family Lifeworks Program that is offered by Nancy Hernandez and Graciela Urruchoa. This was the second year they have offered the program to us. We hope to have it offered to us next year. They made arrangements to present the middle school program to the seventh and eighth grade during the fall semester and include the sixth grade in the spring semester. Our students were in much need of another person reiterating what the teachers and staff model in word and action every day. In our busy world today, our students need the information they have to offer because parents are still not conversing with their children. Parents have become more aware because the students are taking some information home.

We hope that the parent component to the program will become better attended and better utilized by our school. Our school is situated in a lower socio-economic area and the opportunity of having a program such as this is of great benefit to all of us. The parent components are divided into parents of children that are in pre-kinder through fourth grade, fifth grade through eighth grade, and parents of all these ages coming together for sessions titled "Homemaking with Love." The components of the Family Lifeworks cover skills/virtues that are necessary to establish in the home as the children grow and develop.

All in all, we are very pleased with the well-developed program that Family Lifeworks has offered us and we hope we can have it available to us this upcoming school year.

Sincerely in Christ

Mary J. Crow
